PRIMARY EXAMINER

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1-22 are allowable over the prior art of record because the prior art of record does not teach the claimed subject matter including wherein the substrate is pre-treated in the vapour of a pulsed, magnetic field-assisted cathode sputtering operation, and during pre-treatment a magnetic field arrangement of a magnetron cathode with a strength of the horizontal component in front of a target of 100 to 1500 Gauss is used for magnetic field-assistance with a power density of the pulsed, magnetic field-assistance, and wherein after pre-treatment further coating is effected by means of cathode sputtering, with a power density of the pulse, magnetic field assisted cathode sputtering operation, during pre-treatment being greater than 1000 W-cm^{-2} .

The closest prior art of record to Munz et al. (EP 1 260 603) does not qualify as prior art under 35 U.S.C. 102(a) because the invention was not known or used by others in this country or patented or described in a printed publication. Specifically the inventors of this application are the same as the inventors in EP 1 260 603.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney G. McDonald whose telephone number is 571-272-1340. The examiner can normally be reached on M- Th with Every other Friday off.
